

Weekly Report

Period: 10/27/2014 – 11/02/2014

Project

This week, we had a discussion on the interface of our climate visualization system. Time-varying volume rendering is ready. Due to that the climate data is still not prepared by Titan, we tested some fake datasets. In the next week, we will finish a summarization document for Beijing.

Research

According to the re-reviews from the TVCG reviews, I updated our paper again and sent a version to Prof. Zhang. Once I get his feedback, I will revise our paper again and submit it to the TVCG submission system.

In addition, I was reviewing the TVCG paper. I can finish the review before we fly to Paris.

Work to be done in next week

- Update our TVCG paper according to Prof. Zhang's feedback
- Finish review for the TVCG paper
- Prepare data for our ClimateVis system
